

Bioanalysis

Sequani is a UK based CRO with its heritage dating back over 40 years. We are positioned at the forefront of pharmaceutical and biotechnology product developments and chemical safety testing. Bursting with experience, excellence and expertise, we take pride in offering superior value for money, greater flexibility and speed of response- turning data into decisions and defining the way forward. We thrive upon joining our clients upon their mission to achieve high quality data derived by undertaking each project to the highest regulatory standard. Our flexibility, adaptability, strategic programme management and scientific rigour guarantees our customer satisfaction.

Sequani's dedicated, purpose built bioanalytical laboratories incorporate advanced HPLC/ UPLC front end systems and AB Sciex tandem mass spectrometry instrumentation and software.

Speed, accuracy and precision- Our bioanalytical team, provide high quality analytical methodology in support of both GLP and non-GLP non clinical studies across a variety of matrices. Headed by a bioanalyst with over 25 years' experience and trained in the pharmaceutical industry, further supported by a team with a wealth of experience in the field, we offer a devoted nonclinical service analysing samples for studies undertaken both on and off-site.

Our bioanalysis team has been at the forefront of developing microsampling techniques; the benefits of which are now receiving the industry recognition they deserve. We were early investigators in the development and application of dried blood spot methodology and are involved in industry initiatives to maximise the utility of capillary microsampling.

sequani
NON CLINICAL

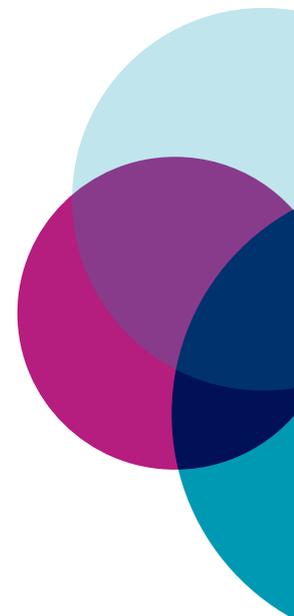

great people, great work, real results

Bioanalysis

Whether you require a standalone bioanalysis service or would prefer it as part of a package, Sequani can tailor a bespoke service unique to your study.

STUDY TYPES

Method Validation
Method Transfer
Partial Validation to other Species
Analyte Stability
Metabolite Quantification
Non Clinical Sample Analysis
Toxicokinetic Data Interpretation

Sequani can offer bespoke packages at competitive prices to suit your needs.
